Remember When

<https://remember-whenn.herokuapp.com/> | <https://github.com/MickellGlad32/Remember-when>

- Capstone/Graduation project made over a 2 week span to demonstrate skills learned during an intensive 4 month cohort.
- Designed to solve the common issue of simple storage and retrieval of user photos by category
- Front-end built using primarily React, Redux, HTML, CSS, and React Bootstrap
- Back-end was a seamless merge of Google Firebase to store the images and send a url to be stored in a PostgreSQL database
- Contributions were setting routes, models, and migrations with Sequelize, compiling information taken from input fields along with url sent back from Firebase to the database (Beekeeper). Getting images and collected data and sending it to the front end to be rendered to the user's homepage

MusicLink
